

LAKSHMI PRIYA A

lakshmipriya.anbu07@gmail.com | +918925763003 | Chennai, Tamil Nadu 600118

Personal Summary

Software Developer with experience building reliable, user-friendly applications and product features across mobile, backend, and connected device platforms. Proven ability to improve product quality, enhance user experience, debug complex issues, and deliver consistent results in fast-paced development environments. Strong problem-solving mindset with a focus on clean implementation, continuous learning, and practical software solutions.

Skills

- **Programming Languages:** Swift, C, JavaScript, TypeScript, Python
- **Mobile App Development:** iOS Development, SwiftUI, UIKit, Core Data, SwiftData, MVVM
- **Frontend Development:** HTML, CSS, JavaScript, TypeScript, Angular
- **Backend Development:** Node.js, Express.js, REST APIs, Firebase, PostgreSQL
- **Embedded & Firmware Development:** Embedded C, ESP32, LVGL, Microcontroller Programming, Firmware UI Development, BLE Communication
- **AI & Generative AI:** Python, Generative AI, Large Language Models, RAG, MCP
- **DevOps & Tools:** Git, GitHub, Docker, Kubernetes
- **Design & Quality:** UI/UX Basics, Wireframing, Debugging, Testing

Experience

Software Developer | Greater Goods India Private Limited - Chennai, Tamil Nadu | 06/2024 - Current

- Contributed to iOS, web, backend, and embedded development projects, delivering high-quality features, responsive interfaces, and reliable user experiences.
- Developed iOS application features and reusable UI components with a focus on product quality, usability, and performance.
- Built and enhanced Angular-based web components using HTML, CSS, and JavaScript.
- Supported backend API integrations and testing for application workflows.
- Worked on embedded firmware display interfaces using C, ESP32, and LVGL for connected device products.
- Contributed to testing, debugging, and upskilling in LLM, RAG, and MCP technologies for upcoming AI-focused initiatives.

Software Developer Intern | Greater Goods India Private Limited - Chennai, Tamil Nadu | 01/2024 - 05/2024

- Contributed to backend development by building APIs, managing PostgreSQL databases, and using GitHub for version control.
- Assisted in API documentation, testing, and collaborative software development processes.

Projects

PROJECTS

ME App – Connected Health & Measurement Application

Swift, SwiftUI, UIKit, Core Data, SwiftData, Bluetooth Integration

- Developed iOS features for connected health devices, including Bluetooth pairing, live measurements, stable measurements, and device data handling.
- Built a customizable dashboard with drag-and-drop metric cards, similar to iPhone home screen interactions, using UIKit and SwiftUI integration.

- Developed graph and trend visualization screens inspired by Apple Health patterns to improve measurement history readability and user engagement.
- Implemented key user flows, reusable UI components, animations, and responsive layouts to improve usability and product experience.
- Supported debugging, UI refinements, performance improvements, and issue resolution across multiple app modules.

Sage Kettle App – Interactive Smart Kettle Experience

Swift, SwiftUI, App Clips, NFC, iOS

- Built an interactive iOS experience for Smart Kettle workflows with clear navigation and user-friendly screen flows.
- Created an iOS App Clip to provide lightweight access to kettle functionality without requiring full app installation.
- Implemented NFC tag-based App Clip launch flow to improve product accessibility and onboarding.
- Supported testing and validation of App Clip behaviour, NFC launch flow, and iOS device interactions.

Internal Test App – Bluetooth Device Testing Application

Swift, SwiftUI, UIKit, Core Data, Bluetooth Integration

- Implemented Bluetooth workflows for device discovery, connection, authentication, and measurement data handling.
- Improved reliability through structured state management, asynchronous operations, and Core Data-based local storage.
- Built reusable UI components and managed device/user data flows to support testing and validation.

Embedded Firmware & Display UI Projects – Smart Kettle and BPM Display

C, Embedded C, ESP32, LVGL, Embedded Firmware, UI/UX

- Contributed to Smart Kettle firmware exploration, device setup workflows, display behaviour.
- Designed and implemented BPM display screens using LVGL.
- Built reusable LVGL UI components and validation logic to route invalid measurements to appropriate warning or error screens.

Sage – Nutrition & Measurement Application

Swift, SwiftUI, Core Data, Bluetooth Integration, Backend APIs

- Developed ingredient search, filtering, and nutrition-focused interfaces to streamline user interactions.
- Integrated Bluetooth scale measurement workflows for accurate real-time data capture.
- Built and supported backend API routes, database operations, and data handling for reliable application workflows.
- Created reusable SwiftUI components with a focus on clean design, consistency, and maintainability.

Angular Web Application

Angular, TypeScript, HTML, CSS

- Built responsive Angular components and workflow screens across multiple modules.
- Improved layout structure, usability, and design consistency for frontend application screens.
- Developed reusable UI components and optimized state handling to improve maintainability.

Education

Sri Sivasubramaniya nadar college of Engineering | Chennai, Tamil Nadu | 07/2024

Bachelor's degree: Electrical Engineering

Certifications and Licenses

Career Essentials in Project Management

Highest Career Level

2-3 years experience

Industry

Languages

- Tamil, Fluent
- Hindi, Intermediate
- English, Fluent
