

LAKSHMI PRIYA A

lakshmipriya.anbu07@gmail.com | +918925763003 | Chennai, Tamil Nadu 600118

Personal Summary

Results-driven Software Developer skilled in creating user-friendly applications and product features for mobile, backend, and connected devices. Enhances product quality and user experience while efficiently debugging complex issues. Focused on delivering consistent results in fast-paced environments through clean implementation and practical software solutions.

Skills

- Mobile App Development: iOS Development, SwiftUI, UIKit, Core Data, SwiftData, MVVM
- Frontend Development: HTML, CSS, JavaScript, TypeScript, Angular
- Backend Development: Node.js, Express.js, REST APIs, Firebase, PostgreSQL
- IoT Firmware Development
- AI & Generative AI: Python, Generative AI, Large Language Models, RAG, MCP
- Programming Languages: Swift, C, JavaScript, TypeScript, Python
- DevOps & Tools: Git, GitHub, Docker, Kubernetes
- Agile Software Development

Experience

Software Developer | Greater Goods India Private Limited - chennai | 06/2026 - Current

- Developed embedded firmware and display interfaces using **C, ESP32, and LVGL** for connected smart-device products.
- Built **Alexa Smart Kettle** features using **TypeScript, Alexa Skills Kit (ASK), and Alexa Presentation Language (APL)**.
- Designed responsive APL interfaces for **real-time device monitoring, kettle controls, presets, scheduling, and device settings**.
- Integrated REST APIs and authentication services, securing communication between Alexa, cloud services, and IoT devices.
- Debugged API integrations and device-state synchronization, ensuring reliable cloud communication and smooth end-to-end Alexa workflows.
- Collaborated with cross-functional teams to develop, test, and troubleshoot connected-device features, enhancing overall product delivery.

Software Developer | Greater Goods India Private Limited - Chennai, Tamil Nadu | 06/2024 - Current

- Contributed to iOS, web, backend, and embedded development projects, delivering high-quality features, responsive interfaces, and reliable user experiences.
- Developed iOS application features and reusable UI components with a focus on product quality, usability, and performance.
- Built and enhanced Angular-based web components using HTML, CSS, and JavaScript.
- Supported backend API integrations and testing for application workflows.
- Contributed to testing, debugging, and upskilling in LLM, RAG, and MCP technologies for upcoming AI-focused initiatives.

Software Developer Intern | Greater Goods India Private Limited - Chennai, Tamil Nadu | 01/2024 - 05/2024

- Developed APIs, managed PostgreSQL databases, and utilized GitHub for version control in backend development.
- Supported API documentation, testing, and software development collaboration to enhance project outcomes.

- Developed and maintained user-friendly applications for various projects.
- Collaborated with senior developers to troubleshoot software issues.
- Participated in code reviews to ensure best practices and quality standards.

Projects

PROJECTS

ME App – Connected Health & Measurement Application

Swift, SwiftUI, UIKit, Core Data, SwiftData, Bluetooth Integration

- Developed iOS features for connected health devices, including Bluetooth pairing, live measurements, stable measurements, and device data handling.
- Built a customizable dashboard with drag-and-drop metric cards, similar to iPhone home screen interactions, using UIKit and SwiftUI integration.
- Developed graph and trend visualization screens inspired by Apple Health patterns to improve measurement history readability and user engagement.
- Implemented key user flows, reusable UI components, animations, and responsive layouts to improve usability and product experience.
- Supported debugging, UI refinements, performance improvements, and issue resolution across multiple app modules.

Sage Kettle App – Interactive Smart Kettle Experience

Swift, SwiftUI, App Clips, NFC, iOS

- Built an interactive iOS experience for Smart Kettle workflows with clear navigation and user-friendly screen flows.
- Created an iOS App Clip to provide lightweight access to kettle functionality without requiring full app installation.
- Implemented NFC tag-based App Clip launch flow to improve product accessibility and onboarding.
- Supported testing and validation of App Clip behaviour, NFC launch flow, and iOS device interactions.

Internal Test App – Bluetooth Device Testing Application

Swift, SwiftUI, UIKit, Core Data, Bluetooth Integration

- Implemented Bluetooth workflows for device discovery, connection, authentication, and measurement data handling.
- Improved reliability through structured state management, asynchronous operations, and Core Data-based local storage.
- Built reusable UI components and managed device/user data flows to support testing and validation.

Embedded Firmware & Display UI Projects – Smart Kettle and BPM Display

C, Embedded C, ESP32, LVGL, Embedded Firmware, UI/UX

- Contributed to Smart Kettle firmware exploration, device setup workflows, display behaviour.
- Designed and implemented BPM display screens using LVGL.
- Built reusable LVGL UI components and validation logic to route invalid measurements to appropriate warning or error screens.

Sage – Nutrition & Measurement Application

Swift, SwiftUI, Core Data, Bluetooth Integration, Backend APIs

- Developed ingredient search, filtering, and nutrition-focused interfaces to streamline user interactions.
- Integrated Bluetooth scale measurement workflows for accurate real-time data capture.
- Built and supported backend API routes, database operations, and data handling for reliable application workflows.
- Created reusable SwiftUI components with a focus on clean design, consistency, and maintainability.

Angular Web Application

Angular, TypeScript, HTML, CSS

- Built responsive Angular components and workflow screens across multiple modules.
- Improved layout structure, usability, and design consistency for frontend application screens.
- Developed reusable UI components and optimized state handling to improve maintainability.

SpendWise - Personal Finance Tracker

Angular, TypeScript, Express.js, Prisma, PostgreSQL, SwiftUI

- Developed a full-stack personal finance application with secure JWT authentication, expense tracking, budgeting, transaction categorization, and spending analytics.
- Implemented receipt scanning, CSV bank statement import, duplicate detection, and automated transaction categorization.

- Built a responsive Angular frontend with reusable components and integrated REST APIs for seamless data management.
- Designed a shared TypeScript model layer and developed backend unit tests to improve application reliability and maintainability.

GitQuest – Interactive Git Learning Platform

Angular, TypeScript, Express.js, Node.js

- Developed an interactive Git learning platform featuring live command simulation, commit graph visualization, branch mapping, and gamified learning workflows.
- Implemented Git repository operations, merge conflict simulations, and real-time repository state management on the backend.
- Built interactive lessons, quizzes, achievements, and developer activity dashboards to enhance the learning experience.
- Designed reusable Angular components and responsive user interfaces for an intuitive developer-focused experience.

MiniRedis Visualizer – Redis Inspired In-Memory Database

Node.js, Express.js, Angular, TypeScript

- Built a Redis-inspired in-memory key-value database supporting strings, lists, hashes, sets, key expiration (TTL), and Redis-style commands.
- Implemented command parsing, automatic key expiration, type validation, and shared in-memory state management.
- Developed an interactive Angular dashboard for real-time data visualization, command execution, and command history tracking.
- Created automated backend tests and integrated CI workflows to improve code quality and reliability..

Education

Sri Sivasubramaniya nadar college of Engineering | Chennai, Tamil Nadu | 07/2024

Bachelor's degree: Electrical Engineering

Certifications and Licenses

Career Essentials in Project Management

Highest Career Level

2-3 years experience

Industry

Software Development
